Decorative and Functional Hardware

Premium Series Combination shutter panels have square edge stiles and rails. They are built using mortise and tenon construction, raised panels (raised 1 side) and "flush face" design (all stiles and rails are the same thickness). Millennium Panels are standard with all Premium Series panel shutters (optional cedar panels available). True louvers are used on this combination shutter. This Premium Series Shutter is fully customizable; almost any part can be modified and located to suit your needs.

PREMIUM SERIES LOUVER/PANEL COMBINATION
